PROFILE

Quality engineer focused on automation frameworks, risk-based testing, CI/CD quality gates, and early defect prevention across banking platforms, microservices, mobile applications, and agile teams.

EXPERIENCE

Jan 2023 — Present

Senior QA Engineer (Automation & Quality Strategy)

TBI Bank

- Designed and led a cross-organization test automation framework from scratch, moving delivery toward an automation-first model.
- Integrated Claude Code across QA—from requirements and edge-case analysis to risk-based test design, traceable documentation, reviewed automation, and synthetic test data—verifying every output against business rules, protecting confidential data, and feeding lessons back into the process.
- Led a QA maturity assessment across 13 agile teams; findings became a recurring practice and informed broader automation adoption.
- Introduced JMeter and k6 performance testing; identified a sustained-load memory leak ahead of Black Friday and enabled mitigation before an incident.
- Built defect leakage analysis, strengthened quality gates, tested banking microservices and mobile apps, and mentored peers.

Dec 2020 — Mar 2022

Quality Assurance Specialist

Barcode Systems, Bulgaria

- Elicited requirements, authored user stories, reviewed ERP/BA integration specifications, and coordinated QA–Dev work across the SDLC.

May 2020 — Aug 2020

Intern QA

Crea.bg

- Designed validation scenarios and built a Selenium automation framework to improve early issue detection.

CORE SKILLS

Automation

Python, Playwright, Selenium, API testing, Postman, Swagger

Performance

k6, JMeter, capacity testing, non-functional quality gates

Quality

QA strategy, maturity assessment, defect leakage, risk-based testing, mentoring

Delivery

GitHub Actions, CI/CD, Agile, PostgreSQL, MS SQL Server

SELECTED PROJECTS

Portfolio QA automation demo

Playwright-based E2E test automation with reusable fixtures and page objects.

car-watcher

Python scraper with scheduled GitHub Actions alerts for new vehicle listings.

github.com/anastasiyaSG/car-watcher

Evolved CV Builder

React and TypeScript CV builder with editable sections and PDF export.

github.com/anastasiyaSG/evolved_cv_builder

EDUCATION

2019 — 2020

QA Automation training

Software University (SoftUni)

Programming Basics with C#; Fundamentals of Programming with C# (Jan 2020, 6.00/6.00); QA Automation (May 2020, 5.02/6.00); Agile Fundamentals with Scrum (Jan 2022, 6.00/6.00).

2013 — 2015

MSc, Logistics Engineering

Technical University of Sofia

Grade: A / Excellent. Thesis: "Passenger and Baggage Flows at an Airport Terminal". Honor award for excellent academic results.

2008 — 2012

BSc, Aviation Engineering

Technical University of Sofia

Electrical aviation engineering, radar and navigation systems.

Engineering background in safety-critical, process-driven fields, which shaped my risk-based approach to quality.

CERTIFICATION

ISTQB Certified Tester, Specialist Level — Test Automation Engineer
